About Me

Second-year BEng (Hons) Computer Science undergraduate at IIT Sri Lanka, with a growing focus on DevOps practices including containerization, CI/CD pipelines, and system monitoring, backed by hands-on experience as a full-stack developer across web and mobile applications. Proven team leader and independent developer seeking an industry placement to contribute to a dynamic team and grow as a software professional.

EDUCATION

BEng (Hons) Computer Science (*January 2025 – Present*)

Informatics Institute of Technology (IIT), Sri Lanka |
Affiliated with University of Westminster, UK

- Currently: 2nd Year
- Key Modules: Object Oriented Programming, Web Development, Database Systems, Machine Learning.

Foundation Certificate in Higher Education (*January 2024 – August 2024*)

Informatics Institute of Technology (IIT), Sri Lanka |
Affiliated with University of Westminster, UK

- Key Modules: Fundamentals of Programming (Python), Mathematics for Computing, Academic Writing, Databases.
- Achievement: Completed with Merit.

G.C.E. Ordinary Level (2023)

- Results: A3 (ICT, English, Mathematics), B4, C1, S1

SKILLS

DEVOPS & SRE

- Docker | GitHub Actions
- CI/CD | Linux | Flask
- Railway | System Monitoring

PROGRAMMING LANGUAGES

- Python | JavaScript | Java
- HTML/CSS

FRAMEWORKS & TOOLS

- React | React Native
- Node.js | MySQL
- Git & GitHub | Chart.js

LANGUAGE

- Sinhala
- English
- Tamil

PROJECTS

Mind Wave – Student Mental Health App 2025 (Nov) – Present.

- Live mobile and web app helping students manage stress — features mood tracking, AI chatbot, community page, and wellness insights.
- Led the development team, overseeing planning, feature prioritization, and design coordination across the full product lifecycle.
- Containerized backend using Docker and deployed to Railway; managed real-time data with Firebase.
- Built and maintained a GitHub Actions CI/CD pipeline to automatically build and test Docker images on every push.

Technologies: *React Native, Node.js, Firebase, Docker, Railway, GitHub Actions, Expo.*

Server Monitor Dashboard 2026 [GitHub Repository](#)

- Real-time system monitoring tool built independently to explore SRE and DevOps practices.
- Python agent using psutil collects live CPU, memory, disk, and network metrics, served via a Flask REST API and visualized on a live Chart.js dashboard.
- Dockerized the app for one-command deployment; resolved Docker host isolation challenges on Windows.
- GitHub Actions CI/CD pipeline auto-builds and tests the Docker image on every push to main.
- Browser-based alert system with toast and push notifications when metrics exceed thresholds (CPU >80%, Memory >85%, Disk >90%).

Technologies: *Python, Flask, psutil, Docker, GitHub Actions, HTML5, CSS3, JavaScript, Chart.js.*

Portfolio Website 2026 [GitHub Repository](#)

- Personal Portfolio with a full production-grade DevOps pipeline - multi-stage Docker builds served via Nginx reverse proxy, auto deployed to Vercel on every push.
- 3 stage GitHub Actions pipeline (Test - Build - Deploy) with mandatory test passing before deployment.
- 12+ automated tests via Vitest and React Testing Library; Husky pre commit hooks enforce zero linting errors before every commit.

Technologies: *React, Vite, Docker, GitHub Actions, Vercel, Framer Motion, Material-UI.*

REFEREES

Mr. Manul Singhe

Senior Lecturer
Informatics Institute of Technology
manul.s@iit.ac.lk

Mr. Mohamed Thariq

Senior DevOps Engineer
