About Me

BSc (Hons) Computer Science undergraduate at IIT Sri Lanka (affiliated with University of Westminster, UK) focusing on DevOps practices, including containerization, CI/CD pipelines, and system monitoring. Backed by practical experience in full-stack web and mobile development alongside modern AI capabilities. Proven team leader and independent developer seeking an industry placement to contribute effectively and grow professionally.

Key Skills

- **DevOps & SRE:** Docker, CI/CD, GitHub Actions, Linux (Ubuntu), Flask, Railway, System Monitoring, Nginx.
- **Programming Languages:** Python, JavaScript, Java, HTML5, CSS3, SQL.
- **Frameworks & Libraries:** React, React Native, Node.js, Express, Chart.js, Vitest, React Testing Library.
- **Tools & Cloud Platforms:** Git, GitHub, GitHub Copilot, Firebase, MySQL, Vercel, Expo, Husky.
- **Languages Spoken:** English, Sinhala, Tamil.

Projects

Mind Wave – Student Mental Health App

2026

Website: mindwave-app.com — Technologies: React Native, Node.js, Firebase, Docker, Railway, GitHub Actions, Expo

- Developed a cross-platform mobile and web application supporting student wellness through mood tracking, an AI chatbot companion, community pages, and real-time wellness insights.
- Led a 6-member team through full-lifecycle product planning, feature prioritization, task delegation, and design coordination.
- Containerized backend services using Docker, deployed seamlessly to Railway, and managed real-time data persistence via Firebase.
- Architected a GitHub Actions CI/CD pipeline to automate building and testing Docker images on every code push.
- **Experience & Learnings Gained:** Acquired end-to-end team leadership capabilities, gained deep hands-on expertise in setting up production deployment pipelines, and learned effective multi-platform state management with React Native and Expo.

Server Monitor Dashboard

2026

Repository: [GitHub Repo](#) — Technologies: Python, Flask, psutil, Docker, GitHub Actions, HTML5, CSS3, JavaScript, Chart.js

- Designed an independent, real-time system monitoring tool to simulate modern Site Reliability Engineering (SRE) and infrastructure practices.
- Built a Python lightweight agent utilizing `psutil` to stream CPU, memory, disk, and network telemetry via a Flask REST API to a Chart.js dashboard.
- Dockerized the system for streamlined single-command execution while resolving complex Docker host-network isolation obstacles on Windows platforms.
- Implemented a browser-based automated alerting mechanism with toast and push notifications triggering on high system thresholds (CPU > 80%, Memory > 85%, Disk > 90%).
- **Experience & Learnings Gained:** Deepened practical knowledge of system telemetry extraction, containerized network isolation resolution, automated test integration, and custom alert thresholds in SRE workflows.

Personal Portfolio Website

2026

Live Site: mohamed-afzal-lovat.vercel.app — Repository: [GitHub Repo](#)

Technologies: React, Vite, Docker, GitHub Actions, Vercel, Framer Motion, Material-UI, GitHub Copilot

- Built a modern personal portfolio integrated with a multi-stage Docker build served via an Nginx reverse proxy and continuous auto-deployments to Vercel.
- Established a 3-stage GitHub Actions CI/CD pipeline (Test → Build → Deploy) enforcing mandatory automated test passes prior to production rollouts.
- Authored 12+ automated tests using Vitest and React Testing Library while configuring Husky pre-commit hooks to guarantee code quality and zero linting errors.
- **Experience & Learnings Gained:** Mastered automated frontend testing strategies, pre-commit enforcement hooks, production-grade web server configurations using Nginx, and accelerated prototyping using GitHub Copilot.

Education

BSc (Hons) Computer Science

2025 – Present

Informatics Institute of Technology (IIT), Sri Lanka (*Affiliated with University of Westminster, UK*)

- Status: Undergraduate
- Key Modules: Object-Oriented Programming, Web Development, Database Systems, Machine Learning.

Foundation Certificate in Higher Education

2024

Informatics Institute of Technology (IIT), Sri Lanka (*Affiliated with University of Westminster, UK*)

- Achievement: Completed with Merit
- Key Modules: Fundamentals of Programming (Python), Mathematics for Computing, Academic Writing, Databases.

G.C.E. Ordinary Level

2023

Zahira College, Colombo

- Key Results: A3 (ICT, English, Mathematics), B4, C1, S1.

Certifications

- [Docker Training Course for the Absolute Beginner](#) – KodeKloud 2026
- [Lab - Linux Tutorial](#) – KodeKloud 2026
- [Oracle SQL - A Complete Introduction](#) – Udemy 2026
